

Adding A Fence

Rick Hills
June 11, 2020

Goals for Today

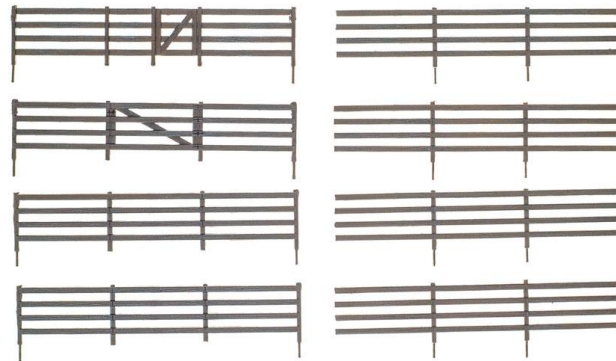

- Discuss New 2020 Fence Offerings from Woodland Scenics
- Fence Application Ideas for your Layout
- Installation and Review

Woodland Scenics Offerings

- In May 2020, Woodland Scenics announced six modular fence solutions for O Scale, HO and N Gauge:
 - Barbed Wire #3000
 - Chain Link #3003
 - Log #3001
 - Privacy #3005
 - Rail #3002
 - Picket #3004

Fence Solutions All Scales

Rail Fence

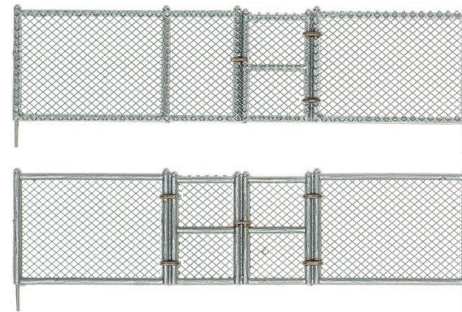

Fence Application Ideas

- Fun Uses:
 - Barn Yards
 - Rail Yards
 - Security
 - Amusements
 - Barriers
 - People Control
 - Animal Control
 - Boundaries
 - etc, etc, etc!

Installation and Review

- I chose the Chain Link Fence solution.
- The Woodland Scenics Chain Link Solution contained:
 - Double gate: 6" by 1.5"
 - Single gate: 6" by 1.5"
 - 6 Fence Sections: 6" by 1.5"
 - Instruction card
 - No glue (use a contact cement or Super Glue)

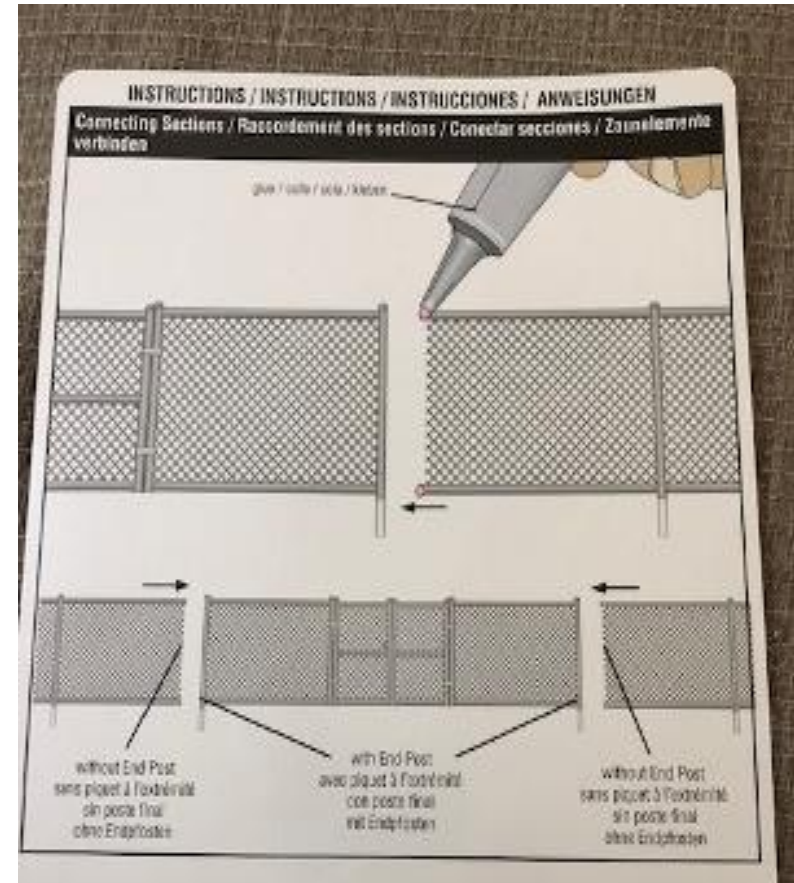

Installation Process:

Steps

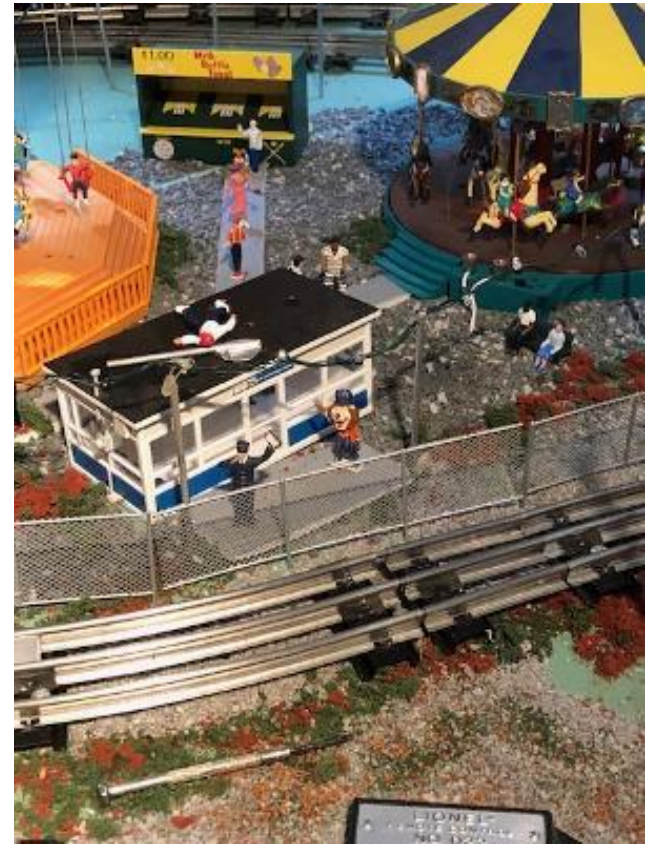

Connecting Sections

Tip: You should ensure you are installing on a level surface and that your fence sections are flat, first. Also make all necessary cuts with knife or blade before gluing.

Temporary Layout Placement for our meeting (no final measurements, straightening, cutting, or glues applied)

Evaluation

- Nice product, easy to install, nicely detailed
- Available in O Gauge
- A bit pricy \$17.99 or so for 49", but my feeling is the level of beauty/detail and simplicity of installation far outweigh the cost
- I would recommend using a variety of different fences on your layout and spice your fences up even more by adding people, animals, guards, LEDs!
- There are two great Videos on Fences (click below)
